AREAS OF EXPERTISE

Mobile Application Development
| Web Development | MERN
Stack | Flutter | Kotlin |
Networking (CCNA) | Ethical
Hacking (Cybersecurity) | API
Integration | ERP Administration
| E-Learning Systems | SEO
Optimization | Version Control
(Git/GitHub)

KEY ACHIEVEMENTS

- Delivered 10+ completed digital projects across web, mobile, and ERP support.
- Improved client website loading speed and SEO ranking through optimized coding practices.
- Reduced system downtime for ERP and e-learning platforms by implementing structured user workflows.
- Built reusable code templates that cut development time by over 30%.

PROFILE

A professional Software Developer with practical experience in mobile app development, web technologies, and networking fundamentals. Skilled in building functional Android applications, responsive websites, and scalable systems using modern tools such as Kotlin, Flutter, JavaScript, and Python. Demonstrates strong problem-solving ability, clean coding practices, and a commitment to delivering high-quality digital products. Passionate about developing secure, scalable, user-centered digital solutions while continuously advancing knowledge in software engineering and cybersecurity

ACADEMIC QUALIFICATION

DEDAN KIMATHI UNIVERSITY	2021 – 2026
• Bachelor of Science in Computer Science	
S-Hook, Power Learn Project	2025 June
• Certificate in Software Development – MERN Stack	
Cisco Networking Academy	2024 - Present
• Certificate – Ethical Hacking / Cyber Security	2024
◦ CCNA 1 - Introduction to Networks	2025
◦ CCNA 2 - Switching and Routing	
◦ CCNA 3 - Ongoing	2026
Power Learn Project (PLP Africa)	
• Blockchain-101: Ongoing	
•	

ISAAC KARIUKI

SOFTWARE DEVELOPER & PROGRAMMER

WEB PROJECTS COMPLETED

- `plasmawaterafrica.com` – Corporate website setup, content management, performance optimization.
- `mastereddelights.vercel.app` – Cake shop e-commerce site (products, cart system, mobile optimization).
- Personal Portfolio Websites – Multiple responsive portfolios created for clients and self-use.

HOBBIES

- Coding & open-source contribution
- Researching new software tools
- Playing football, cycling, strategy games
- Attending tech meetups & networking with developers

WORK EXPERIENCE

Freelance Software Developer & System Support

Self-Employed

2023 – Present

- Designed and developed functional websites and e-commerce platforms for SMEs and individuals.
- Managed ERP user accounts, permissions, and content updates for small organizations.
- Supported e-learning platforms including content upload, LMS administration, and student onboarding.
- Developed responsive web interfaces using HTML, CSS, JavaScript, and MERN.
- Built mobile applications using Flutter and Kotlin for portfolio and client demos.
- Integrated REST APIs, Firebase authentication, and cloud data handling.
- Conducted basic cybersecurity practices such as password policy enforcement, secure system configuration, and vulnerability awareness.

PROFESSIONAL DEVELOPMENT

- Gained strong hands-on experience in MERN stack development.
- Improved understanding of network configuration using Cisco systems.
- Built secure applications with principles learned in Ethical Hacking.
- Expanded capabilities in mobile development through Kotlin and Flutter.
- Strengthened knowledge in ERP and LMS system administration.
- Improved system security awareness and safe coding practices
