PROGRAMMING STACK

CORE TECH & INFRA

RECOGNITION

- Delivered 5+ Enterprise Systems.
- Cisco Academy Excellence.
- Cybersecurity Specialist.

Code that works. Infrastructure that lasts.

I bridge the gap between high-level software engineering and the core network it runs on. From architecting Laravel APIs and React dashboards to configuring the routing, VLANs, and DNS that power them, I deliver end-to-end reliability.

Experience

Systems & Software Support Engineer Embu Level 5 Hospital

2026 – PRESENT

- Modernizing hospital management software using **Laravel & Python** architectures.
- Managing high-available network infrastructure via **Cisco Enterprise protocols**.
- Optimizing core **PostgreSQL** databases for extreme uptime and patient data security.

Full-Stack Developer (Consultant) Digital Solutions / Freelance

2023 – PRESENT

- Building responsive **Next.js** e-commerce platforms with automated **Docker** deployments.
- Engineering secure RESTful APIs via **Django & Node.js** for diverse SME clients.
- Implementing **CI/CD pipelines** to ensure zero-downtime deployment cycles.

Education & Credentials

BSc. Computer Science

2021 – 2026

Dedan Kimathi University of Technology

Cisco Certified Network Associate (CCNA)

2024 – 2026

Cisco Networking Academy

Key Projects

MkulimaHub (AI-SaaS)

Agri-tech stack using React/Node and AI for crop diagnostics and real-time data.

PlasmaWaterAfrica

Scalable e-commerce architecture with integrated logistics and inventory tracking.
